

Institutional Deployment

Narrative Infrastructure Build & Handover

Planned duration: Eight weeks, subject to agreed scope and institutional readiness.

Institutional Grammar

Narrative architecture, language, visual logic, message hierarchy, audience structure and communication rules.

Operating Infrastructure

Production, distribution, publishing, metadata, automation, market-response data and feedback systems.

Governance

Responsibilities, access permissions, approvals, escalation procedures and limits of automated execution.

Operator Handover

Documentation, access transfer, operating procedures and training for designated institutional operators.

Acceptance & Handover

Scope, technical requirements and acceptance criteria are agreed before deployment. Delivery concludes with acceptance and handover. The institution then assumes responsibility for ongoing operation, maintenance, platform compatibility and associated costs.

2027 / Selection

For 2027, Origin Protocol will undertake up to five institutional engagements, selected for strategic relevance, research value and operational readiness.

Scope and commercial terms are discussed privately.
